Scenes is a collection of operations, for example when indoor temperature is very high then Turn on the air conditioner cold mode automatically

Just click “+” to add your own personal scenes

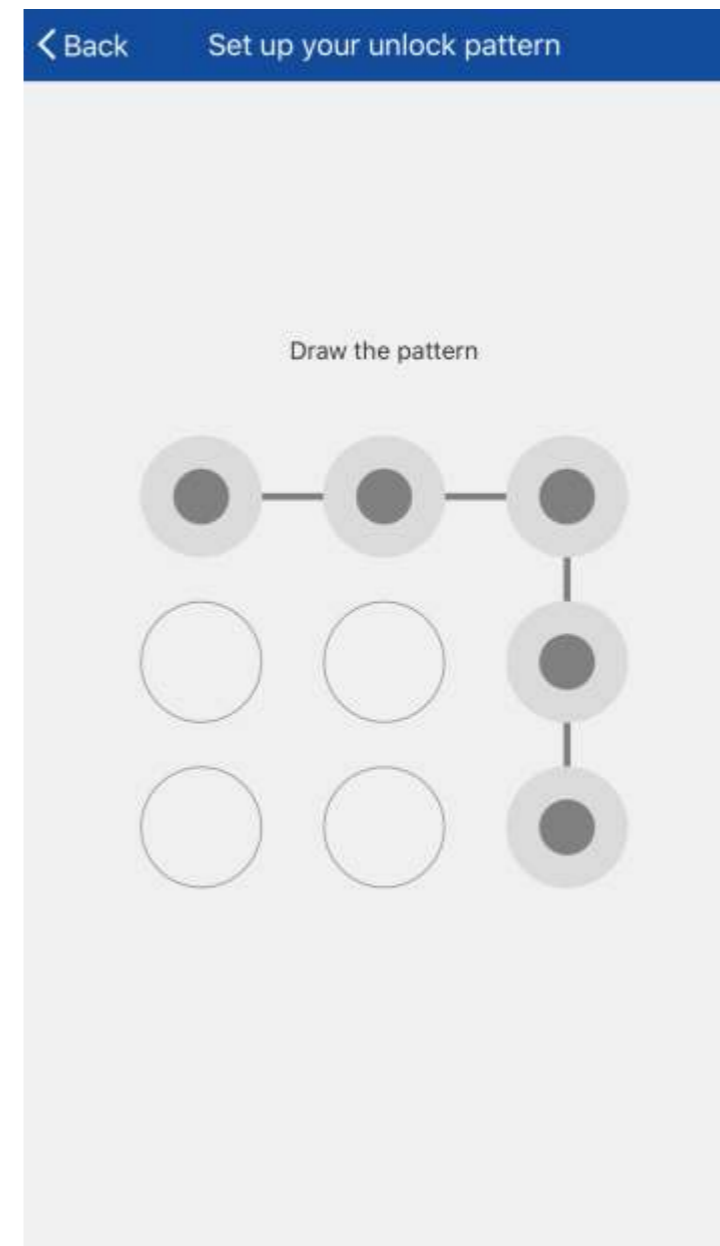

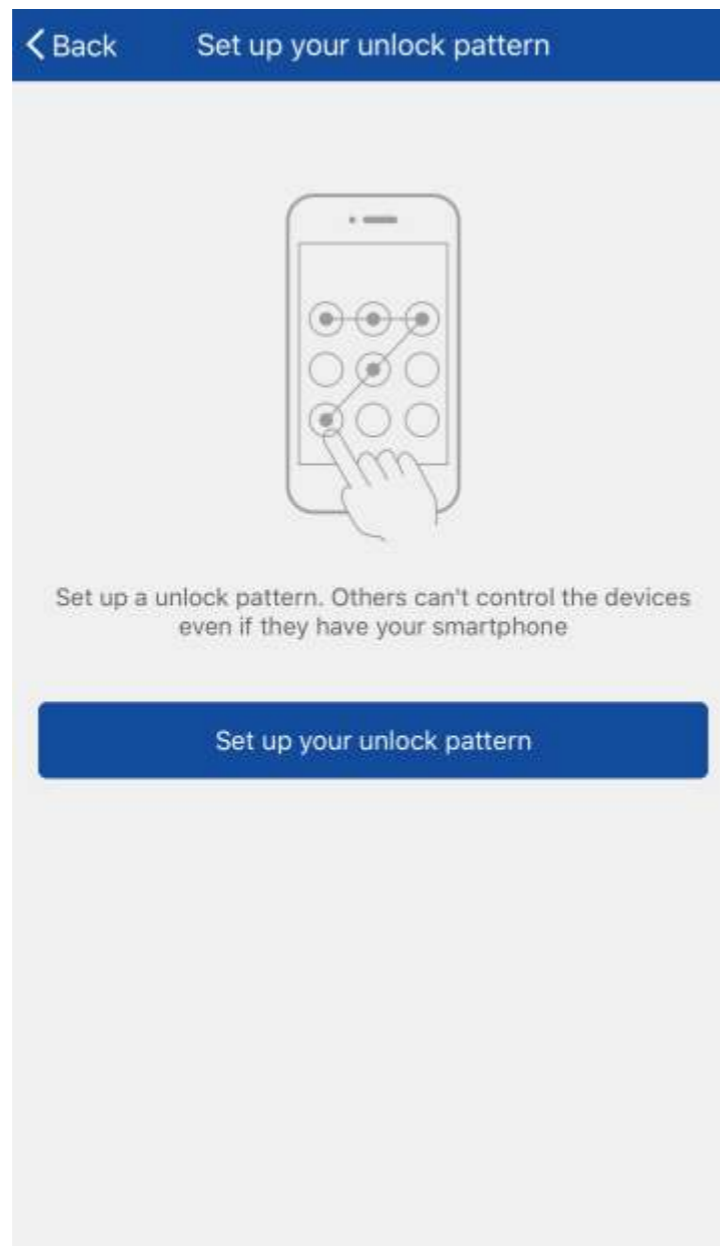

Profile is where users can manage their personal information. The main information includes:

1. Account information
2. Scan QR code: Along with the development platform, developers could preview the control interface of virtual devices
3. Share device: Displays user's device sharing information
4. Message Centre: Displays all messages that system sent to users.
5. Feedback: Where users could submit feedback online
6. About: Displays the current App version information

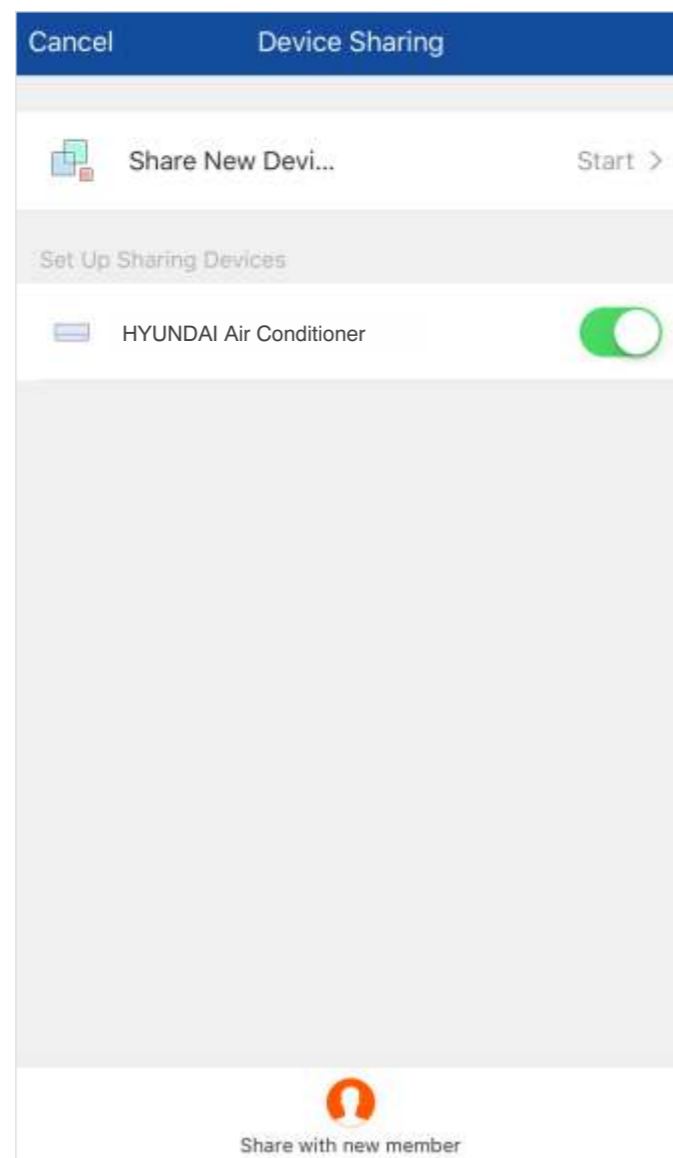

Profile page displays personal account information. Users could change their username and login password, set up unlock pattern and logout of the App in this page.

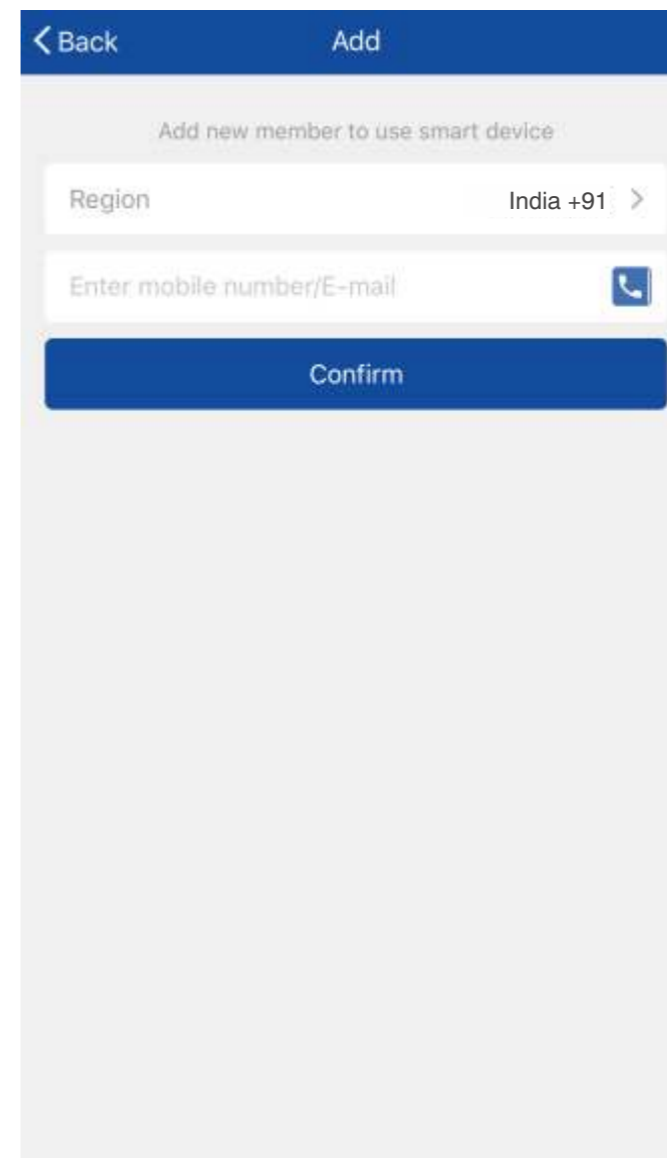

Tap “Pattern unlock” to set up your App unlock pattern. After it is enabled, you need to draw the pattern to unlock the App

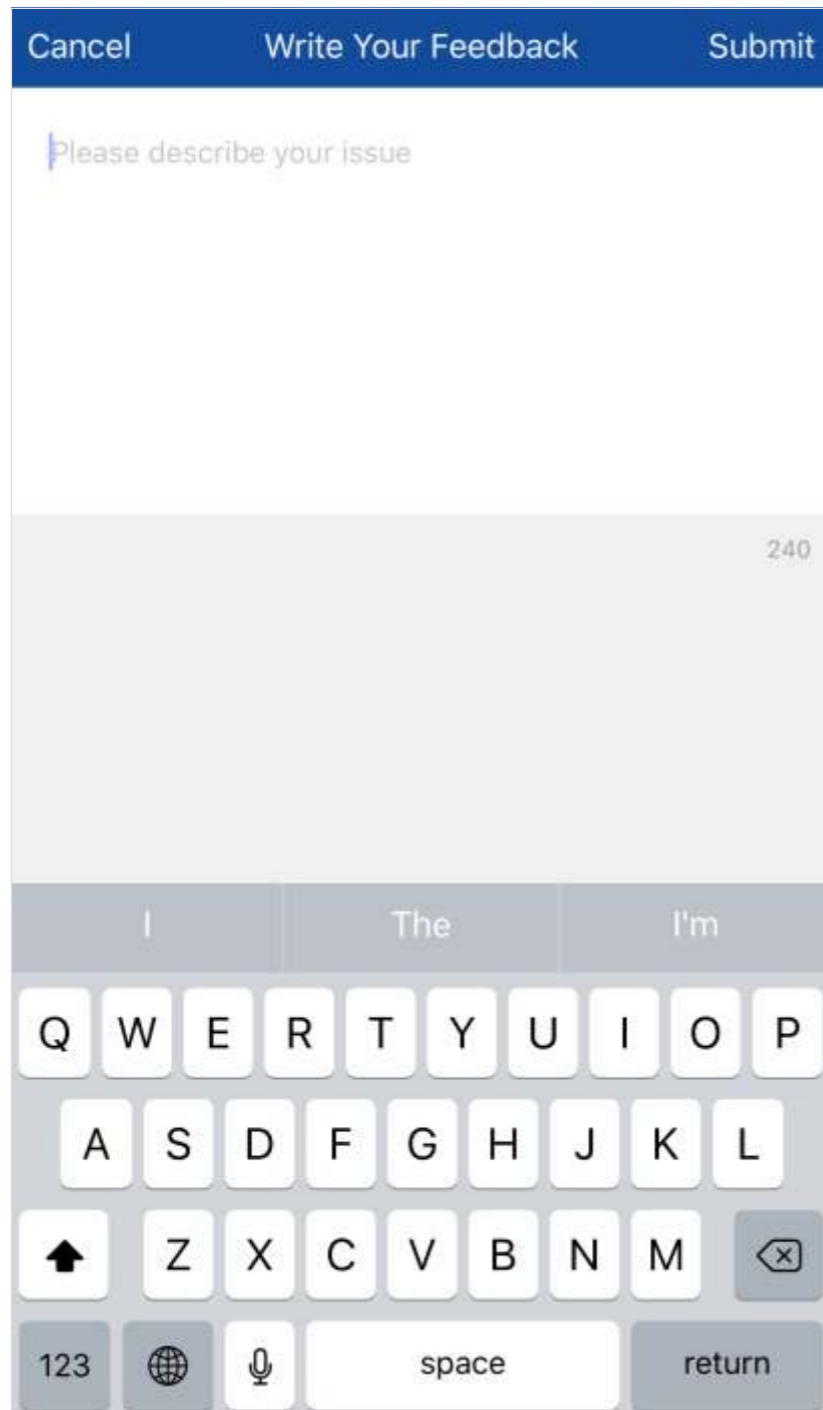

Tap “Share with new member” at the bottom (see picture 1), enter the App account of the user you want to share the device with, then he will receive the shared device.

The image shows a mobile application interface for providing feedback. At the top, there is a blue header bar with three buttons: "Cancel", "Write Your Feedback", and "Submit". Below the header is a large text input field with the placeholder text "Please describe your issue". The input field is currently empty. At the bottom right of the input field, the number "240" is displayed, likely indicating a character count. Below the input field is a standard QWERTY keyboard with a light gray background and white keys. The keyboard includes a shift key, a globe icon for language switching, a microphone icon for voice input, a spacebar, and a return key.

Feedback: users could write the feedback and report any issues related to their smart devices.
